Luxury Pool Build

EI8HT SOUTH ESPLANADE

The EI8HT South Esplanade pool demonstrates outstanding design and workmanship. Finished with striking royal blue mosaic tiles which mimic the sea & sky views that bathers enjoy while using this luxurious pool.

The brief for the EI8HT South Esplanade development was to strengthen Glenelg and the South Esplanade promenade as a premium residential address that reflects 21st-century lifestyles, attitudes to the environment and urban responsibility.

The development's facade ebbs and flows inspired by the changing coastal environment and so a simple rectangle pool for lap swimming would not suffice. Designed by Hydrilla this pool moves away from the traditional lap pool that is typically included in similar residential developments. The pool provides residents with a unique place to relax year-round while enjoying the views and spectacles of living in such an iconic South Australian location.

The pool structure sits over the building's underground car park which left limited space surrounding the pool structure. This proved challenging for the installation of the reticulation pipework which was overcome with some care and thought by Hydrilla's plumbers and construction team.

EI8HT SOUTH ESPLANADE

The luxury apartment pool features Waterco Sand Filters, an Aquarius Auto Chemical Controller, VSD integrated circulation pump for energy efficiency ensuring clean, safe water at all times. A Gas Heater allows residents of the apartment to have year-round blissfully warm water to bathe in.

The quality of workmanship on the pool is outstanding with apartments in the residential complex selling for between \$1 m - \$5 million dollars the execution and finish of this pool needed to be perfect our commitment to high quality construction is evident in the details of this stunning pool. The pool was recognised by the Swimming Pool and Spa industry at the 2021 Awards for Excellence (South Australia) and with a Highly Commended award for the Commercial Pool up to \$500,000 category.
