Kimba, South Australia

CLIENT

Department of Education

CATEGORY

Redevelopment

FEATURES

Fiberglass refurbishment
Disability lift installation

Kimba Area School

Kimba is a rural town situated at the top of the Eyre Peninsula South Australia. The town is situated in a warm temperate climate and has one public pool which had a number of structural and water quality issues.

The Kimba pool has an existing concrete structure which was in poor shape, having been covered over in a previous renovation. In addition to this, access to the pool was limited for anyone with disabilities or physical limitations. For the health and safety of the community it was time the beloved pool was given a complete overhaul.

The scope of works undertaken at the site included:

- Demolishing the existing wading pool and structure, concourse and main pool hob
- Installation of a new skimmer system with safety suction and auto leveler
- New concrete poured for the pool, concourse, ramp and stairs
- Fiberglass coatings applied to all new concrete and gel coating applied to any remaining fiberglass
- Installation of new depth markers, lane ropes and handrails
- Disability lift installed and tested

The finished result is a more modern and accessible pool for the community. The facility now has a reliable water circulation system and a strong structure.

The disability lift provides anyone with mobility issues a safe way to enter and exit the pool.
